MRI SCANS
An alternative to a Post Mortem

**You now have a choice -

MRI Scans in Greater Manchester

The Bolton Council of Mosques (BCOM) **and colleagues from across Greater Manchester, working closely with HM Coroners in the Greater Manchester area, have initiated the use of MRI Scans instead of Invasive Post Mortems. This collaboration is in order to offer families a choice of an invasive Post Mortem or a MRI scan to identify the cause of death.**

What is a MRI scan?

A Magnetic Resonance Imaging (MRI) Scanner is used to scan the body thus allowing the Radiologist to provide the Coroner with the cause of death. This avoids an invasive post mortem and is in line with religious requirements. It also satisfies the needs of many families who wish to avoid their loved ones undergoing a Post Mortem.

How do I choose to have a MRI instead of a Post Mortem?

Where a Post Mortem is necessary, the Coroner may consider the MRI option to determine the cause of death. It is to be noted that the MRI Scan is not acceptable in all cases (e.g. where a forensic Post Mortem is required) and the Coroner will advise you accordingly. If it is acceptable, the Coroner will make the necessary arrangements.

Please note: If the MRI is unable to explicitly reveal the cause of death then there is a possibility that the Coroner will, due to legal and professional requirements, need to undertake an Invasive Post Mortem. The protocol put in place will endeavour to filter out any case where there is likelihood that the MRI will not reveal a cause of death, however this cannot be guaranteed. In such a circumstance, we would request your patience and support in order to avoid an Invasive Post Mortem.

How much will the MRI cost and who needs to pay?

Lodestone Patient Care carry out the MRI Scan and currently charge £885.00 for this service, which includes upto 2 scans. If additional scans are required, the cost will increase, depending on the number of scans required. However you will be advised of the total cost before agreeing to choose to use the MRI option.

There is also a cost for the transportation to the MRI unit. This will depend on the distance and the undertaker used.

The family of the deceased will be responsible for all costs of the MRI process and transportation, which is payable to Lodestones Patient Care and the undertakers. BCoM, on behalf of the family, will administer the payment process and forward a receipt to the family.

This service is provided by BCOM, which is a not-for-profit organisation and is run by a team of dedicated, trained volunteers.

Where and when will the MRI take place?

The MRI Scan will usually be carried out either before 8am or after 6pm and will be carried out either at Rochdale Infirmary or North Manchester General Hospital. Once the MRI is completed and the cause of death is determined, the Coroner will release the body which will be returned to the agreed place of rest by BCOM representatives or the authorised undertakers.

Who will make the arrangements for the MRI?

The BCOM representatives or your local community contact will be responsible for making all the arrangements on your behalf. All communications will be conducted between the respective Coroner's offices, BCOM's representative or local community contact and the family's representative. We will keep the family informed at all times.

Only accredited and trained representatives will be responsible for handling, transportation and contact with the deceased. Strictly no family members will be allowed to be involved in the process.

Contact your local burial committee, Mosque or BCOM for more information.
